Education
Vanderbilt University July 2019 - Jan 2020

Graduated in January 2020 with honors from the extensive six month Full Stack Web Development program at Vanderbilt.

Projects
Stitch Smith - Project Manager
https://bpsanos.github.io/Project-1/

This application generates an outfit template for the user to wear for the day. It looks at your location and takes the temperature or your area into account. This app uses Javascript, Weather API, and a color API.

Clicky Game - React Application
https://bpsanos.github.io/Clicky/

This is a react based web application. You click an image and then they shuffle. The goal is to click all the images only once. Also it's Batman themed. Batman is awesome.

Bamazon - MySQL
https://github.com/bpsanos/bamazon

This application implements a simple command line based storefront using the npm inquirer package and the MySQL database backend together with the npm mysql package. The application presents two interfaces: customer and manager.

Skills
Browser Based Technologies: HTML5, CSS3, Javascript, Python, etc

Databases: MySQL, MongoDB

Server-Side: Node.js, Express, React

Deployment: Heroku, Git
